Flowchart/overview of dangerous goods shipments v. 1.0

You know you are going to ship one or more chemicals by air/land cargo

START PREPARATIONS NOW!

Are the chemicals you are going to send classified as dangerous goods/DG (IATA restricted)?

No → It is not IATA restricted - send responsibly by normal transport… yourself

I dont know… → Try and figure out, e.g. by finding the MSDS (materials safety data sheet). Look at pt. 14 - no UN/IATA no.? - Not DG

Yes → Fill in the *Materials/shipping info-template* as described in the guide and email to richter@chem.au.dk

I still dont know… → Contact Bo Richter to get classification of your materials richter@chem.au.dk

Await reply/instructions, then follow these for packing and labelling

Provide package/papers for final control and use Budstikken to order pick up of your package

Save and keep record of all information, for ease of future shipments and for documentation purposes
